Dear Mr. Rever, School Board, and Staff,

Subject: Request for installation of sand pits at École Glenmore Elementary School

We are writing to formally advocate for the installation of the sand pits on school property to support events associated with the track and field season.

Track and field is a highly anticipated season at our school, met with enthusiasm and excitement from students. The absence of needed infrastructure limits the students ability to train and be fully prepared to participate in track and field season.

During the Spring 2025 track and field season, students were dropped off by parents at Watson Road Elementary to use the available sand pits. This created logistical challenges for families who aren't able to travel to a different location and resulted in some students not being able to participate.

We believe that the installation of sand pits at École Glenmore Elementary School would improve access to all students, allow students to fully train and prepare for the track and field season, and increase participation in engagement and physical education.

Thank you for your commitment to providing inclusive and enriching learning environments for our children. We look forward to working together to bring this valuable addition to our school and district community.

Sincerely,
École Glenmore Elementary Parent Advisory Counsel
