

eLEMENT SUPER VILLAIN

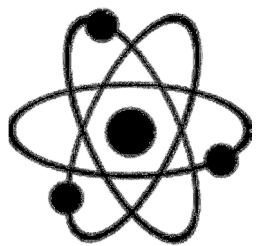

You are to create a cartoon super villain based on one element from the Periodic Table. Give your character a suitable name, and a catchphrase or motto. You will present this character in the form of a brief, illustrated magazine article. Your article must have an interesting title, at least one illustration, and should provide some background information on your villain, their special powers, and their past crimes, based on the properties of your chosen element: atomic number, symbol, atomic mass, group number and period, state at room temperature, origin of the name, discovery, and common uses. Be as creative as you can.

Marking Scheme

2 marks	Interesting title
5 marks	Creative, coloured drawing of your villain
3 marks	Character name
3 marks	Catchphrase or motto
1 mark	Chemical symbol
1 mark	Atomic number
1 mark	Atomic mass
1 mark	Group number and period
1 mark	State
2 marks	Origin of the name
